Education

Higher Institute for Advanced StudiesBachelor of Bachelor of Business Information Systems	Oct. 2021 – May 2025 Cairo, Kattameya

Summary

A student in the fourth year with a bachelor's degree in information systems from the Institute for Advanced Studies, specializing in front-end development, proficient in HTML, CSS, JavaScript, with experience in frameworks and libraries, including SASS, Bootstrap, Angular, in addition to C#, Sql server, MVC, and API. I demonstrate my abilities through the projects I have undertaken and also through the institute, with strong skills in creating web interfaces. Fast response and easy to use. I also have experience in CCNA, having worked in the field of networks and have sufficient experience.

Exp erience

Through the projects I trained on

C# Web Developer

April 2023 – September 2024
Cairo, Giza

I significantly enhanced my Front-end development skills through this Working on projects, where I focused on:

- Completed an intensive training program in C# Web Development, where I learned both fundamental and advanced C# concepts.
- Gained practical knowledge in using MySQL , Sql Server for database design and management.
- Learned and applied MVC in building advanced and scalable web applications.
- Developed numerous projects, including fully integrated web applications using C#, Sql Server, and Mvc , Api.

By Zero Web School

Front-End Developer Intern

June 2023 – October 2022
Online

I significantly enhanced my Front-end development skills through this internship, where I focused on:

- Designing and implementing responsive and accessible web interfaces using HTML, CSS, and JavaScript. Collaborating with
- a team of developers to integrate backend functionalities into front-end designs. Utilizing modern frameworks and libraries
- such as React.js to enhance user interactions and streamline development pro cesses.
- Conducting usability tests and gathering feedback to iteratively improve user interface designs.
- Learning agile development methodologies and version control systems to ensure efficient project management and code maintenance.

Zero Academy Courses

Engineer Christine courses (ITI)

Front-End Developer - C# Web Developer

June 2022 – April 2024
Online

I acquired my front-end development skills and backend expertise from Zero Academy. , engineer Christine
Key highlights of my learning journey include:

- Mastering foundational concepts of HTML and CSS, essential for creating structured and visually appealing web pages.
- Developing proficiency in JavaScript to add interactivity and functionality to web applications. Exploring advanced topics
- such as responsive web design and accessibility to ensure optimal user experiences across devices.
- Learning C#, Sql Server , MySQL, and MVC to build robust and scalable backend systems.
- Applying principles learned to real-world projects and assignments, enhancing my problem-solving and coding abilities.
- Keeping pace with industry trends and best practices through continuous learning and engagement with the Academy's resources.

Projects

Online courses

| Html5, Css3, Javascript, Bootstrap, Wow.js   September 2023
- Designed and developed a landing page for an To view online courses website using HTML and CSS.
- Integrated Bootstrap for responsive design and a cohesive layout. Implemented stunning effects using
- JavaScript and the wow.js library to enhance user engagement. Ensured compatibility across various
- screen sizes and devices for a seamless user experience.

Nike shoe display system (Nike) | Html5, Css3, Javascript   October 2023
- Creation: A website to display Nike's distinctive shoes.
- screen sizes and devices for a seamless user experience.
- Integrated Bootstrap for responsive design and a cohesive layout.
- Implemented stunning effects using
- Designed and developed a landing page for an To To display Nike shoes website using HTML and CSS.

Website to buy products - Graduation|Project   MVC , Iibrary Identity, EF Core , Solide , Html , Css ,   November 2023
JavaScript, Sql Server , OOP , BootStrap,
UintOfWork , RepositoryPattern , Areas , C#

Design and development of online buying and selling platforms using the C# programming language
   Integrated Bootstrap for responsive design and a cohesive layout. .
• Implementing a data storage system using Sql Server to maintain data locally without the need for external APIs.
Programming tables used to display, add, and delete data using Data Tables, JavaScript, and AJAX to enable customers to manage products securely.

GameZome Website | Html5, Css3, C#,MVC, EfCore
• Website development: A website is designed that is easy to use and quick to use. • MVC Integration: MVC   May 2024
products are used and displayed on demand. • Improved performance: page loading speed and overall site
responsiveness. • User interface design: creating an interactive interface for users to the site and display
products.

CRUDS Project | Html5 , CSS , Bootstrap, C#, Sql Server
• Developed a CRUD application using C# that involved creating, reading, updating, and deleting records   June 2024
in a Sql Server
• The project included designing user interfaces with HTML and CSS, handling server-side logic with C#, and ensuring
   database.
   data validation and security.
• Tested the system to ensure all functionalities, including search, worked correctly and smoothly, making performance
   enhancements as needed.

Technical Skills

· Html5	· OOP	· Solid Principles	· Git
· Css3	· C#	· Desgin Patterns	· Github
· Bootstrap	· MVC	· Linq	· Mysql
· Sass	· API	· Angular	· React.js
· Javascript	· EF Core	· SQl Server	

Languages

• Arabic   • English(Good)

Other Skills

Communication	· Problem Solving	· Over-the-air internet networks
· Self-education	· Attention to detail	· I have a full year of practical experience
·
